Project Design Phase-I

Solution Architecture

Date	3 October 2022
Team ID	PNT2022TMID40488
Project Name	Corportate Employee Attrition Analysis
Maximum Marks	4 marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing problems in the organizations by the employee attrition.
- Describes the structure, characteristics, behavior, and other aspects of the software to HR in the organizations to make a wise move in case of employee attrition.
- Define features, development phases, and solution requirements of the project.
- Provide specifications according to which the solution is defined, managed, and delivered to the organization HR.
